What is this product?

Type

■ This product is a class of shares of the Sub-Fund and denominated in EUR. The Fund is an open-ended investment company with variable capital ("SICAV") and qualifies as an Undertaking for Collective Investments in Transferable Securities ("UCITS"), subject to Part I of the Luxembourg law of 17 December 2010 related to undertakings for collective investments ("Investment Fund Law"), transposing Directive 2009/65/EC related to UCITS.

■ As an investment fund, the return of the Sub-Fund depends on the performance of its underlying assets.

Investment objective:

■ The target is to reach, over the long term, a return of Euribor 3 months +250 bps via investments in different asset classes. The main source of the return will result from the asset allocation decisions.

Investment policy:

■ The global approach of the Sub-Fund is to be flexible and benchmark-agnostic, i.e. the assets will principally be allocated on the basis of the risk-return profile of each potential investment and on the correlation with the other investments in the portfolio.

■ The asset allocation and asset exposure in any given asset class will be managed dynamically.

■ The Sub-Fund will principally invest in equities and equity related securities (including, but not limited to, convertible bonds, equity linked notes, low exercise price warrants and warrants on equities, ADRs, GDRs and closed-ended real estate investment trust (REITs), fixed income securities, and money market instruments, UCITS and UCI (including those established as exchange traded funds). Structured products can also be selected if the risk-return profile can improve the sub-Fund's efficiency, but such investments, if any, will be limited to 15% of the Sub-Fund's net assets.

■ Investments in ADRs/GDRs and REITs will not exceed 10% of the Sub-Fund's net assets respectively.

■ According to the Sub-Fund's investment strategy the Sub-Fund may invest up to 20% of the Sub-Fund's net assets in bonds which, at time of investments, are rated between investment grade (Baa3/BBB-) and speculative grade (CCC) by one or more of the main agencies (Moody's, Standard & Poors and Fitch).

■ The Sub-Fund will not invest more than 5% of the Sub-Fund's net assets in bonds which, at time of investments, are rated below speculative grade (CCC) by one or more of the main agencies (Moody's, Standard & Poors & Fitch).

■ For a maximum of 25% of its net assets, the Sub-Fund may seek exposure to commodity markets through eligible exchange traded commodities (ETC) (according to the Law of 2010 and relevant CSSF circulars).

■ The Sub-Fund may invest without limitation in any country, including up to 50% of its net assets in emerging market countries.

■ The Sub-Fund may gain exposure to companies which are domiciled in, or with main activities, within the Peoples Republic of China markets indirectly by investing in ADRs/GDRs UCITS & UCIs. These investments in Chinese markets will be nevertheless limited to 25% of the Sub-Fund's net assets.

■ The Sub-Fund will not invest in asset backed securities or in mortgage backed securities.

■ For hedging and for investment purposes, the Sub-Fund may use financial derivative instruments traded on a regulated market, provided they are contracted with first class financial institutions specialized in this type of transactions. In particular, the Sub-Fund may take exposure through financial derivative instruments and forwards on any eligible underlying, such as but not limited to currencies, interest rates, transferable securities or financial indices.

■ The Sub-Fund may receive OTC derivatives (including, but not limited to, warrants) via corporate actions. However it will not invest directly in OTC derivative except from forwards.

■ The Sub-Fund is actively managed without reference to a benchmark.

■ This financial product does not promote environmental or social characteristics and does not have as its objective a sustainable objective.

■ The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

■ Given the above investment objective and policy and the risk and reward profile of the product, the recommended holding period is 5 years.
